

Performance-of-baseball-players

It's a story of baseball players performance including the visualizations required to describe the data

my initial version:

https://public.tableau.com/profile/mohamed3906#!/vizhome/story_v1_32/Story1?publish=yes

my final version:

<https://public.tableau.com/profile/mohamed3906#!/vizhome/performanceofbaseballplayersstory/Story1?publish=yes>

summary :

the data given shows a table containing name ,handedness,weight , height and HR of the players

I used these data to make visualizations first in work sheets then collect them to a dashboard

including the visualizations required to describe the data,showing what's factors affecting the performance like body weight , height , handedness,

all are visualized and collected together.

design :

After downloading data I used Tableau to make the requird visualizations

I used histogram and side by side bars

feedback :

first I received a normal impression about my initial version , then

I received a good feedback from friends about my final result,it was amazing to them.
